

Original Full Narrative(3rd iteration):

The game begins with a boot screen, opening up to a generic 2000s desktop; old and very obviously dated.

On the desktop are a few titled **folders** - *memories*, and *screenshots*; and **apps** - an msn type of *messaging app*, and a typical *internet browser* (it 404's, you do not have access to the internet), and an editor/trainer you can use to alter the buggy parts of the game(you obtain it in lvl 3).

After the player browses through the main chat log until the most recent message from 2006, a notification pops up on the messaging app - your old best friend Dave from almost a decade ago is on the app with you! What a (convenient) coincidence.

~~Counter relic pieces: upon successfully opening up 4 password locked files within the desktop, the player/mike obtains a counter relic they can use to hit the demon in game - making it possible to kill the demon and get the "good" ending~~

- This idea is put on the backburner for now, but the password unlock element is kept to have the player keep track of what things they have at their disposal at the desktop

langelo_iz_kewl2000: sounds good
XXxx_04v3_xxXX: Okay! Perfect!
XXxx_04v3_xxXX: Here's the standalone .exe file for it:
XXxx_04v3_xxXX: **XXxx_04v3_xxXX has sent you the file:**
KnightsofGoodandEviliv.exe
langelo_iz_kewl2000: oh thanks
langelo_iz_kewl2000: good thing you sent it
langelo_iz_kewl2000: i dont seem to have it anymore lol
langelo_iz_kewl2000: but yeah
langelo_iz_kewl2000: just need to remember my deets now
XXxx_04v3_xxXX: That is okay.
XXxx_04v3_xxXX: I will wait for you in the game.

After the brief conversation, Mike downloads Knights, short for Knights of Good and Evil IV, and immediately encounters a login screen.

Of course, since a literal decade passed, Mike forgot his login details. He navigates through the desktop, finding his original username from an old in-game screenshot, and his password through a notepad document titled "supersecretdocDONOTOPEN".

After getting his account details, he manages to log in to the game.

Once within the game, Mike notes that all of their progress is reset. A short dialogue/active cutscene within the game begins, with Mike expressing his disappointment and "Dave"(The Demon) being a guide in helping Mike progress through the gamegame.

Dialogue

(within gamegame; lvl 0 - lobby):

Note: the player/mike is forced to read the dialogue, as the demon/regan is blocking the only way out

Regan XVII: You remembered your log in! Excellent.

Langelo: uh why are we in the main lobby? werent we at that final boss last time we played?

Regan XVII: We were.

Regan XVII: But the servers got reset in 2012 due to them getting hacked :(.

Regan XVII: So we are back at square one.

Langelo: seriously?

Langelo: well no point in dwelling over the past i guess

Langelo: but uh
Regan XVII: Yes?
Langelo: what do we do here again lol
Regan XVII: Ah, right.
Regan XVII: Well, we move on.
Regan XVII: Not much to do in the lobby.
Regan XVII: We have no time to lose.
Langelo: oh okay

(Regan leaves the lobby, unblocking the door)

(within gamegame; lvl 1 - find the key):

(upon entry:)

Regan XVII: Right, first things first.
Regan XVII: You need to find a key somewhere within this room to continue.
Regan XVII: Bot prevention, and all.
Langelo: oh yeah
Langelo: makes sense
Langelo: sorta
Langelo: time to explore lol
Regan XVII: Take your time.
Regan XVII: There is no rush :).
Regan XVII: I already have the key, so I will wait for you near the door.

(after collecting the key:)

(Note: an invisible wall blocks your path; it disappears after the dialogue finishes)

Regan XVII: Great job!
Langelo: easy as ever
Regan XVII: Let's go!
Regan XVII: Follow me!
Langelo: aight

(within gamegame; lvl 2 - find the sword & combat intro):

(the player can explore the area freely as the conversation continues)

Langelo: oh damn

Langelo: i remember this place

Regan XVII: Oh?

Langelo: yeah

Langelo: you get the first sword here

Langelo: and that stupid vaguely told story of "4 pieces of the holy relic that will vanquish the evil invader"

Langelo: or something

Regan XVII: Oh! Yes!

Regan XVII: That is a major part of the game!

Regan XVII: With each room we complete, we collect a piece of the shattered relic.

Regan XVII: We have four pieces to collect in total.

Regan XVII: The relic assembles itself once we collect the final piece.

Regan XVII: Without the completed relic, defeating the final boss is impossible.

Langelo: ok fair

Langelo: cool

Langelo: generic fantasy plot and all

Langelo: my favorite

Langelo: but uh

Langelo: wheres the sword

(animation: the sword majestically floats down from the heavens with an equally majestic sfx and over the top light effect)

Langelo: oh

Langelo: man

Langelo: thats so corny lol

Langelo: a product of its age huh

Regan XVII: Haha! Agreed!

(after getting the sword)

Langelo: this feels much more familiar

Regan XVII: Great to hear!

Regan XVII: Do you remember what you need to do next?

(enemies spawn; they growl; a beat passes before the next message)

Langelo: that lol

Langelo: good ol hack n slash

Langelo: i got this

(you go and kill the 5 enemies that spawn in, Regan rushes to the enemies, as if trying to damage them, standing near the portcullis once the player defeats all the enemies)

Regan XVII: Excellent!

Regan XVII: You killed all the enemies!

Langelo: that was pretty boring though lol

Regan XVII: Haha! Agreed!

Langelo: yeah

Langelo: anyways

Langelo: now what?

(a piece of the relic appears out of nowhere near the exit door, with an even holier sounding sound; the demon blocks the way out)

(note: the relic has an invisible barrier blocking it, preventing the player from obtaining it before the dialogue finishes)

Langelo: oh

Langelo: was knights always this

Langelo: extra?

Regan XVII: Haha.

Regan XVII: Yes, it always was :D.

Langelo: lol alright

Regan XVII: Right, so!

Regan XVII: Collect the first piece of the relic near the gate so we can continue onward.

Langelo: okay

(the player/mike collects the relic)

Regan XVII: Well done!

Regan XVII: Let us go, my friend :D!

(the demon leaves)

(within gamegame; lvl 3 - introducing the editor):

Castle entry garden

(Regan passes by the bridge like normal, waits for Langelo to come over to continue)

Regan XVII: Quickly now!

Regan XVII: The faster we get to the castle, the sooner we can be permanently done with this game!

(Langelo tries to continue, but falls through, getting respawned at the start)

Langelo: uh

Langelo: was that meant to happen?

Regan XVII: What now?

Langelo: i tried to walk through the bridge

Langelo: but i just fell through

Langelo: theres no way for me to continue

Regan XVII: That...is not ideal.

Regan XVII: Hmm...

Langelo: what do we do?

Langelo: should we restart the game?

Langelo: ill restart the game

Regan XVII: Wait!

Langelo: huh?

Regan XVII: I will send you the Editor for the game.

Langelo: editor?

Langelo: what editor?

Langelo: how did you even get it?

Regan XVII: I will explain later :).

Regan XVII: **XXxx_04v3_xxXX has sent you the file: KGE4Editor.exe**

Regan XVII: Right now, open up the Editor, and use it to help you continue through the bridge.

Langelo: hm

Langelo: okay

(the player enables the bridge, continuing onward)

Regan XVII: Excellent work, Mike!

(the player+regan defeat the enemies)

Regan XVII: Let us go, my friend :D!

Langelo: dave wait

(Regan rushes toward the maze, uncaring about the collisions, gunning straight to the top of the stairs)

Langelo: wait!!

Langelo: omg dude

Langelo: we dont have to rush this hard!!

(langelo reaches the entrance of the maze)

Langelo: oh god

Langelo: this

Langelo: ok ok i remember this part

Langelo: cant pass through this maze without the key

Langelo: need to find the damn key

Langelo: and also ask dave what the hells the deal behind the editor

Langelo: and why he just bolted like that

(after exiting the maze, while killing enemies and heading towards the castle)

Regan XVII: Ah, there you are, Mike!

Regan XVII: I was beginning to think you were lost.

Langelo: on that?

Langelo: naw dude its gonna take more than that to get me stuck lol

Langelo: but uh dave?

Regan XVII: Yes?

Langelo: why does knights have an editor?

Langelo: and how did you get it

Regan XVII: Ah.

Regan XVII: After the hacking incident in 2012, massive bugs started appearing within the game :(.

Regan XVII: So, the developers released the editor tool to the community, so they could directly counteract these bugs themselves :(.

Langelo: thats

Langelo: insane

Langelo: but fair enough

Langelo: this game is like a million years old at this point lol

Regan XVII: Haha, yes.

Regan XVII: But, luckily for us, most of the game is functioning as intended.

Regan XVII: Soon, we will get rid of him.

Langelo: the boss?

Regan XVII: Yes.

Regan XVII: The one and only :).

Regan XVII: Collect the relic, and we shall be on our way.

Langelo: okay

(within gamegame; lvl 4 - “everyone is here!” - gauntlet toward the end):

The gauntlet - dave/regan disappears, reappears later from an inaccessible point

(note: the game stutters when passing by lvls - implying that smth is heavily loading; a text pop up stating “loading” + black screen to indicate further)

Regan XVII: Here we are.

Regan XVII: The courtyard.

Langelo: already?

Langelo: couldve sworn there were more levels

Regan XVII: There were not :o.

Regan XVII: Knights is fairly short :o.

Langelo: damn

Langelo: nice to know i just sucked at this game then lol

Regan XVII: Haha, no, I am sure you did not.

Langelo: dude i did lol

Regan XVII: Haha.

(regan walks for a few seconds, then his character disappears)

Regan XVII has disconnected.

Langelo: what??

Langelo: oh god damn it

(new chat messages from the app begin to appear)

XXxx_04v3_xxXX: Hey, Mike.

langelo_iz_kewl2000: you good man?

langelo_iz_kewl2000: saw you got dced

langelo_iz_kewl2000: should i restart?

XXxx_04v3_xxXX: No, no, that is not necessary.

XXxx_04v3_xxXX: Continue without me, I shall catch up with you soon.

langelo_iz_kewl2000: but

XXxx_04v3_xxXX: Please, Mike.

langelo_iz_kewl2000: ...

langelo_iz_kewl2000: okay

(langelo continues onwards without any further dialogue, reaching the last floor with

regan already standing nearby, “killing” enemies)
(dialogue happens as you kill enemies and get the relic)

langelo_iz_kewl2000: dave??

XXxx_04v3_xxXX: Mike!

langelo_iz_kewl2000: how did you get here?

XXxx_04v3_xxXX: There was a shortcut.

XXxx_04v3_xxXX: I can show it to you later :).

XXxx_04v3_xxXX: Come on!

(regan bolts off, again)

langelo_iz_kewl2000: omg wait!!

(langelo enters level 5)

(within gamegame; lvl 5 - final boss (choice between killing the angel OR killing the demon once the condition for the good ending has been obtained)):

dungeon esque final area

BAD:

(the angel hovers menacingly in the middle of the room, doing nothing but staring at the player)

Regan XVII: There he is!!

Regan XVII: Kill him, Mike, quickly!!

(langelo hits the angel 3 times, killing it)

Regan XVII: Finally.

Regan XVII: He is dead.

Langelo: ok why do you keep calling that creepy ass angel a he

Langelo: it doesnt even look human

Regan XVII: Oh.

Regan XVII: But he was.

Langelo: wait what??

(camera pans to regan, the exit buttons on the game disappear, alongside the control being stripped from the player)

Regan XVII: And here I thought I was going to be in trouble.

Regan XVII: To think, you two have been friends for so long.

Regan XVII: But yet, you did not think for a second that something was amiss.

Regan XVII: All the better for me.

Regan XVII: Now.

Regan XVII: Stay still.

Regan XVII: The less you writhe, the sooner this will end.

Regan XVII: Thank you for being so gullible, Mike.

(black screen drops in - BAD END; ending 1 of 2)

GOOD:

Regan XVII: Go, Mike!

Regan XVII: Now is your chance!!!

Regan XVII: Attack him!!!

Regan XVII: Attack him and be done with this!!!

Langelo: no.

Regan XVII: What?

Langelo: i wont do it.

Regan XVII: What???

Regan XVII: Why not???

Langelo: because i know youre lying to me

Langelo: whoever the hell you are

Langelo: dave is dead

Regan XVII: What are you talking about, Mike?!

Regan XVII: I am Dave :(!

Langelo: the hell you are

Langelo: the real dave died years ago

Langelo: who the HELL are you!!

Regan XVII: ...

Regan XVII: Haha.

(regan tries to take over control over the computer, but the angel stops it)

Regan XVII: Ugh!

Langelo: what??

(the angel joins sides with langelo)

Regan XVII: A true nuisance until the end.

Regan XVII: Very well.

Regan XVII: I did not want to do this, Mike.

Regan XVII: But you leave me with no other choice.

(the true arena appears; the final fight is here.)

Regan XVII: Accept your fate.

Langelo: never!!

Langelo: screw you!!

(epic last fight starts, the player collects keys, slices enemies, and enables collision to destroy the 4 towers; the angel is fighting the demon as you kick ass and destroy the heart)

(after the last tower is destroyed, the player slices the heart, killing the demon)

(painful screams erupt from regan, before it dies like a generic enemy)

(messages from the chat app start popping up. The real dave got control back over his account)

XXxx_04v3_xxXX: Hey, Michael.

langelo_iz_kewl2000: what the hell??

langelo_iz_kewl2000: how are you still here??

XXxx_04v3_xxXX: Wait, please listen to me.

XXxx_04v3_xxXX: It's me, dude.

XXxx_04v3_xxXX: The real me.

langelo_iz_kewl2000: the hell it is.

langelo_iz_kewl2000: not falling for the same bull twice

XXxx_04v3_xxXX: Phish.

langelo_iz_kewl2000: ????

XXxx_04v3_xxXX: You fell for that stupid phishing email back when we were kids.

XXxx_04v3_xxXX: You made the new account with the name of your favorite ninja turtle.

XXxx_04v3_xxXX: We first met in Knights when we both got stuck in the maze lol.
XXxx_04v3_xxXX: Which ended up being the one place we always made a point to never leave each other at.
langelo_iz_kewl2000: oh god
langelo_iz_kewl2000: it is you
langelo_iz_kewl2000: dave
langelo_iz_kewl2000: but how??
langelo_iz_kewl2000: youre dead
XXxx_04v3_xxXX: Yeah.
XXxx_04v3_xxXX: Been that way ever since I stumbled upon Denet.
XXxx_04v3_xxXX: All because that damn demon convinced me that it was going to help.
XXxx_04v3_xxXX: So much for that, huh?
langelo_iz_kewl2000: ...
langelo_iz_kewl2000: so what now?
XXxx_04v3_xxXX: ...
XXxx_04v3_xxXX: I think you know.
XXxx_04v3_xxXX: Got to kill the final boss to end the game.
langelo_iz_kewl2000: dave...
langelo_iz_kewl2000: there has to be a better way.
XXxx_04v3_xxXX: There isn't.
XXxx_04v3_xxXX: I've been dead for years, Mike.
XXxx_04v3_xxXX: You have to kill me.
XXxx_04v3_xxXX: Please.
langelo_iz_kewl2000: ...
langelo_iz_kewl2000: okay
langelo_iz_kewl2000: but
langelo_iz_kewl2000: will you feel any pain?
langelo_iz_kewl2000: i dont want you to die painfully
XXxx_04v3_xxXX: I stopped feeling pain years ago.
XXxx_04v3_xxXX: And besides, better to die by your hand than anyone else's.
XXxx_04v3_xxXX: The hero getting to deal the final blow and all, haha.
langelo_iz_kewl2000: ...
langelo_iz_kewl2000: god i wish we could talk more
XXxx_04v3_xxXX: Me too, dude.
XXxx_04v3_xxXX: I missed this.
langelo_iz_kewl2000: ...yeah.
XXxx_04v3_xxXX: Thanks for everything, Michael.
XXxx_04v3_xxXX: I'm glad we managed to talk, one last time.
langelo_iz_kewl2000: ...
langelo_iz_kewl2000: me too, Dave.

(the camera locks onto the angel, the last task unavoidable)

langelo_iz_kewl2000: im sorry

XXxx_04v3_xxXX: I know.
XXxx_04v3_xxXX: I forgive you.

(langelo kills the angel)
(the game ends)

(black screen drops in - TRUE END; ending 2 of 2)
